Consulting Team

- Betsy Varghese (Dillon), Project Manager
- Anni Buelles (Dillon), Project Coordinator
- Nicole Beuglet (Dillon), Engagement Specialist
- Beth Goodger (Dillon), Senior Waste Specialist

Workshop Objectives:

- Establish Committee Chair
- Present high level findings of the Future State Report
- Brainstorm innovative and long term options that are specific to Guelph
- Review Public Engagement materials

The PAC will act as an advisory committee whose members have been selected to provide input and advice based on their interest and/or experience in waste management, or more generally as community stakeholders. The PAC will be a forum for in-depth discussion of key study issues, concerns and solutions. As with all advisory committees within the City of Guelph, the Solid Waste Management Master Plan (SWMMP) Review PAC is not a decision-making body and will not have the authority to vote or commit City resources, however the committee will advise throughout the process including the development of the recommendations.

Agenda

1. Welcome, Introductions

2. Project Update

3. Establish Committee Chair

- Review PAC Terms of Reference and the responsibility of the Chair

4. Future State Report Presentation (Task 4)

- Project team presentation
- Discussion on other potential needs in the Guelph community

5. Potential Options Brainstorming Session (Task 5)

- Presentation on process to develop long-list of options
- Brainstorming Activity using MURAL:
 - Thinking 10 to 20 years from now, what will be the challenges facing Guelph's waste management system?
 - Discussion on some of the most complex challenges and potential solutions.

6. Plan for Upcoming Community Engagement

- Project team presentation on changes to engagement as a result of COVID-19
- Review of draft public survey and draft layout of online engagement site
