*Universal Accessible Washroom
Electronic Locking System Kit*
TA-UW0BC-KIT

Overview
This K.M. Thomas electronic locking system allows for accessibility into and out of the washroom by persons with or without physical disabilities. In the event of an emergency a "Call For Assistance" system can be activated to request help.

Operation
-Door is normally closed and unlocked.
-The door can be manually opened or automatically opened via the exterior handicap actuator.
-Once a user has entered the washroom they can lock the door via the "push to lock" button which will lock the electric strike, disable outside handicap actuator, and prevent automatic door operator from opening door. The "locked" indicator next to "push to lock" button and exterior "occupied" indicator will be on.
-Exit is always free by inside handicap actuator or by opening door manually, "locked" and "occupied" indicators will turn off.
-In case of emergency the user can push the TA-3241-EP-LED push button which will activate visual and audible signals inside and outside of the washroom. Alarm is reset at the TA-3241-EP-LED switch.
-Emergency access into washroom by using key in outside lever handle.

TA-3230C-KIT
Call For Assistance Kit

The K.M. Thomas TA-3230C-KIT includes the items to comply with "Universal Washrooms" emergency call system requirements.

The TA-3230C-KIT is an emergency call system that consists of audible and visual signal devices inside and outside of the washroom that are activated by a control device inside the washroom.

An emergency sign that contains the words "IN THE EVENT OF AN EMERGENCY PUSH EMERGENCY BUTTON AND AUDIBLE AND VISUAL SIGNAL WILL ACTIVATE" is included and must be applied above the emergency button.

Features:

- Easy to install components
- Simple and intuitive to use
- Cost effective
- Code Compliant!

Includes:

- 1 x TA-3241-EP-LED Emergency Push Button
