

We, my wife and I, are totally opposed to allowing trailers and recreational vehicles to park on city streets. We feel that the safety issue is paramount. Our street is narrow, and parking these vehicles will reduce visibility and potentially prevent easy access for emergency traffic. As RV's in particular will be parked for many months without moving, they will prevent proper snow removal, and street and drain maintenance. We are aware that there are locked and monitored parking areas in the Townships surrounding Guelph which have vacancies. For example, the parking area at Laird Rd West and Puslinch Township Sideroad 10 appears to be less than half full. Finally, parking these vehicles on the street may lead to confrontation between neighbours.

Please do not let Guelph become a third rate campground.

Dave and Dorothy Short.
