Rules for determining Permit fees

A minimum Permit fee of \$115.00 shall be charged for all work for low-rise residential projects where the calculated Permit fee is less than these amounts. Fees identified as low-rise residential apply where there is not more than one dwelling unit above another dwelling unit in a single detached, semi-detached, duplex or row townhouse dwelling.

A minimum Permit fee of \$230.00 shall be charged for all other projects where the calculated Permit fee is less than these amounts.

The occupancy categories in this Schedule correspond with the major occupancy classifications in the Ontario Building Code. For multiple occupancy floor areas, the Permit fees for each of the applicable occupancy categories may be used, except where an occupancy category is less than 10% of the floor area.

For classes of Permits not described in this Schedule, the Chief Building Official shall determine a reasonable Permit fee.

The floor area of the proposed work is to be measured to the outer face of exterior walls (excluding low-rise residential attached garages) and to the centre line of party walls, firewalls or demising walls.

In the case of interior finishes, alterations or renovations, the area of proposed work is the actual space receiving the work. (e.g.: tenant suite)

Attached garages, fireplaces, decks, balconies, porches, exterior basement stairwells and exterior ramps are included in the Permit fee for single detached dwellings, semi-detached dwellings, duplex dwellings and townhouses.

Unfinished basements for single detached dwellings, semi-detached dwellings, duplex dwellings and townhouses are not included in the floor area.

Basement finishes are not included in the Permit fee and will be charged the additional rate for single detached dwellings, semi-detached dwellings, duplex dwellings and townhouses.

Corridors, lobbies, washrooms, lounges, etc. are to be included and classified according to the major occupancy for the floor area on which they are located.

Mechanical penthouses and floors, mezzanines, lofts, habitable attics and interior balconies are to be included in all floor area calculations.

Except for interconnected floor spaces, no deductions are made for openings within the floor area (e.g. stairs, elevators, escalators, shafts, ducts, etc.).

Where interior alterations and renovations require relocation of sprinkler heads, standpipe components or fire alarm components, no additional charge is applicable.

Ceilings are included in both new shell and finished (partitioned) Buildings. The Permit fees for ceilings only apply when alterations occur in existing Buildings. Minor alterations to existing ceilings to accommodate lighting or HVAC improvements are not chargeable.

Where Demolition of partitions or alterations to existing ceilings are part of an alteration or renovation Permit, no additional charge is applicable.

Additional Permit fees are not required when the Sewage System is included with the original Building Permit.

A temporary Building is considered to be a Building that will be erected for not more than three years.

Refund of Permit fees:

In the case of withdrawal or abandonment of an application for a Permit or abandonment of all or a portion of the work or the non-commencement of any project, the Chief Building Official shall, upon written request of the Owner or Applicant, determine the amount of paid Permit fees that may be refunded to the Owner or Applicant, if any, as follows:

- a. 80 percent (80%) if administrative functions only have been performed;
- b. 70 percent (70%) if administrative and zoning functions only have been performed;
- c. 50 percent (50%) if administrative, zoning and plans examination functions have been performed;
- d. 35 percent (35%) if the Permit has been issued and no field inspections have been performed subsequent to Permit issuance;
- e. 5 percent (5%) shall additionally be deducted for each field inspection that has been performed after the Permit has been issued;
- f. A refund will not be made on a Permit where the amount paid was the minimum permit fee;
- g. No refund shall be made after two years following the date of Permit application where the Permit has not been issued or one year following the date of Permit issuance.

Note: In most cases, a building and/or zoning inspection will be required prior to issuance of a refund.
