THREAT REDUCTION

1.1 (A) OWNED CATS

(A) Coordinated efforts directed at cat owners to reduce the number of owned cats outside such as educational campaigns, licensing and no-roam bylaws.

SCORING INDICATORS

Proof of each action required. Two points per action. Generally if you can demonstrate some level of progress for each action, you will be awarded one point. Two points will be limited to comprehensive efforts to address that one issue. For example, for (A) to get 2 points, you need to have a no-roam bylaw AND demonstrate both enforcement of the bylaw and an educational campaign to make cat owners aware of the bylaw.

HOW CRITERIA IS MET

Points Awarded <i>(for completion by Nature Canada)</i>

(C) The bird team and/ municipality either has, or is a partner in programs/ projects to estimate the number and/or distribution of cats outdoors so that progress on reducing the populations of outdoor cats can be tracked over time.

SCORING INDICATORS

Proof of implementation of a cat counting/estimating protocol to establish baseline numbers or to compare with baseline numbers will be awarded 2 points. Proof of intent to implement such a protocol gets one point.

HOW CRITERIA IS MET

Points Awarded <i>(for completion by Nature Canada)</i>

(for completion by Nature Canada)

THREAT REDUCTION

1.4 PESTICIDE USE

DESCRIPTION

Municipality has a policy to reduce or eliminate non-essential pesticide use that directly or indirectly harms birds, on public and private land that is implemented through local bylaws. This policy should include restrictions on pesticides used to control nuisance insects such as mosquitos (such as BTI) unless there is a demonstrated health risk (such as proof of West Nile in larvae).

SCORING INDICATORS

Proof of the policy is provided. Examples of such policies would include a ban on cosmetic use of pesticides. The use of BTI to control mosquitos and blackflies is controversial, in that it is increasingly used by municipalities to kill mosquito and fly larva in wetlands in response to neighbourhood pressure. There is strong evidence that this reduces the available food for aerial insectivores like swallows and has a negative impact on their populations.

HOW CRITERIA IS MET

Points Awarded
(for completion by Nature Canada)

SCORING INDICATORS

Provide proof of measures to protect birds from vehicle collisions. For example, at locations where a busy road cuts through a wildlife corridor, evidence of mitigation would include lower speed limits, signage about wildlife crossing, or proof of engineered solutions such as wildlife underpasses or overpasses.

SCORING INDICATORS

Provide proof of the strategy and its implementation. The strategy to protect biological diversity can be part of the protected areas plan, or vice versa, but must specifically identify protection of biological diversity as a goal. One point is awarded for having an official strategy (adopted by Council). Two points if the strategy has targets and metrics for success and there is evidence of implementation.
