## **Determining Cultural Heritage Value or Interest using criteria from Ontario Regulation 9/06 under the Ontario Heritage Act.**

According to Policy 4.8.1 of the City of Guelph Official Plan, a property may be listed on the City's heritage register if it meets one or more of the following criteria for determining whether it is of cultural heritage value or interest:

1. The property has **design or physical value** because of it,
  - i. is a rare, unique, representative or early example of a style, type, expression, material or construction method,
  - ii. displays a high degree of craftsmanship or artistic merit, or
  - iii. demonstrates a high degree of technical or scientific achievement.
2. The property has **historical or associative value** because it,
  - i. has direct associations with a theme, event, belief, person, activity, organization or institution that is significant to a community,
  - ii. yields, or has the potential to yield, information that contributes to an understanding of a community or culture, or
  - iii. demonstrates or reflects the work or ideas of an architect, artist, builder, designer or theorist who is significant to a community.
3. The property has **contextual value** because it,
  - i. is important in defining, maintaining or supporting the character of an area,
  - ii. is physically, functionally, visually or historically linked to its surroundings, or
  - iii. is a landmark.

When a property satisfies one or more of criteria 1, 2 or 3 above, Heritage Planning staff have used that criteria as the basis in a description of why property has cultural heritage value or interest. The letter/number codes in each property record page correspond to one of the following descriptions of how a property may have cultural heritage value or interest.

The property has design value or physical value because:

D1 – is representative example of a residential design type (and has retained most or all of the integrity of its original massing and exterior materials).

D2 – is a representative example of an industrial building design type (and has retained most or all of the integrity of its original massing and exterior materials).

D3 – is a representative example of an institutional building design type (and has retained most or all of the integrity of its original massing and exterior materials).

The property has historical value or associative value because it:

H1 – has direct associations with a theme that is significant to a community

C1 – is important in defining, maintaining, or supporting the character of an areas; is visually or historically linked to its surroundings (and contributes to the heritage character of the historic residential streetscape – individually or as part of a group of buildings).

C2 – is a landmark.
