Decision Meeting Notice No. 81

To whom it may be a concern

Emma - Earl Street Pedestrian, Bridge

I live at [REDACTED] a apartment building, where 40 tenants live.

Most of us have many concerns. Approx. 2/3 of the land, (about 20 meters) belonging to Perla Holdings Ltd, Toronto I am sure it would be fun to walk and bike over this bridge, in the summer, to spend almost 2 million dollars just for a few people to have fun.

The city of Guelph could use this money for better use, like low income families etc. I hope habitat of Wild-Life and Wetland checked and approved by the Ministry of Environment.

Also the habitants of both apartments building 44, 46 Emma street, are concerned of the people, that would use this bridge other then recreation.

All the loiterings, noise, crime, also breacking into our cars, specially at night. It could happening in a bad way.

We have the Norway bridge, that has been repaired, last summer, crossing over the Speed river, also the Speedriver trail, starts at Speedvale. How many crossings do we need in this area? I have written several letters before about this fun bridge. I am also writing in the name of people that live on Marlboro street. I do hope, that the Guelph council have studied talked, considered of all our concern we have, before the city's council final decision, and will check this area out. I am sure, if you don't live in this area, it would not be of your concern. Thank you for listening.

Sincerely yours
Ursula Bosshard
