

The proposed changes in the attached document regarding shipping containers is unfair and will cause unnecessary expense and inconvenience to many businesses. Our company utilizes shipping containers for temporary storage at our shop as well as our remote sites. The containers are vital to our business operations. Other tenants in our building are in the same situation. The proposed changes will force us and our neighbors to find off site storage which will be very costly. Currently the 3 or 4 containers we might have at our shop at any given time do not impede on parking and are located at the rear of the property out of site from the road. It can't be imagined how these containers are causing any issue with neighbors or the environment. Clearly, the intent of this By-law is to address situations other than ours and therefore should be reconsidered and revised so that businesses such as ours are not unnecessarily burdened. Given the challenges businesses such as ours are currently facing due to the pandemic, an additional expense is the last thing we need. We need our government to help make it easier to do business so we can recover and further contribute to our local economy. Your action and consideration on this matter would be greatly appreciated.

Sincerely,

Sam Mirotta
