

Hello

I am writing to share my concern about the proposed underpass on Edinburgh Road. I am incredibly worried about how it would effect our neighbourhood.

With 5 streets dead ended I am anxious about what that means to be able to get around our community with ease and how it would essentially chop our thriving neighbourhood into bits and effect our sense of community.

I am worried about how my children would be able to travel safely by bike or foot to see their friends that they are currently able to visit with ease but would be cut off from. I also worry for other children in our neighbourhood to be able to travel easily and safely to and from school.

With 22 properties that could be possibly effected I worry for my neighbours and friends as well as myself and what that means for our property value.

I also worry for easy access to the food bank, the businesses in the sunny acres plaza as well as fixed gear brewing which has become a hub in our community.

I believe this would quite literally ruin our neighbourhood and sense of community and I would explore you to consider all of these things while making a final decision.

Thank you
Meghan Barbour
