

Good afternoon,

I would like to submit my comments in regards with the potential construction on 58 Wellington Street East.

I believe this is a very poor and dangerous idea.

1. Considering desperate lack of infrastructure at this location, construction of a new high-rise building would create a constant risk of vehicle collisions and many other highly dangerous situations.
2. Long-term extra loud noise of the construction in front of our building would affect health state of many members living here.
3. High-rise building would completely block the view for condos facing Wellington road, which was in many cases the main reason of purchasing these condos.

Starting construction of the high-rise building at this location is discrimination of interests of people living in Wyndham, most of whom are seniors.

Thank you,  
*Marina Skavych*
