

Staff Report

To	Committee of the Whole
Service Area	Office of the Chief Administrative Officer
Date	Tuesday, March 7, 2023
Subject	Internal Audit Work Plan 2023 - 2025

Recommendation

1. That report titled 'Internal Audit Work Plan 2023- 2025' dated March 7, 2023 be approved.
-

Executive Summary

Purpose of Report

To provide the Committee of the Whole-Audit details regarding the 2023 Internal Audit work plan as well as the 2022 work plan status update.

Key Findings

- Consistent with prior years, the 2023 work plan was developed considering factors including a risk assessment completed by Internal Audit, feedback from management and members of Council, consideration of emerging trends affecting municipalities, and previous audit results.
- The Plan's objective is to assist management and Council in achieving the City's strategic and operational goals and objectives.
- It complies with the City of Guelph's internal audit charter as well as supports the City's Strategic Plan.
- The work plan may be modified during the year as required.
- All internal audit activity is performed in an independent and objective manner.
- 80 per cent of the approved projects were completed in 2022, with an additional two projects in progress as of the report date. All recommendations made during the course of audit execution were agreed upon by management who provided action plans to address them.

Strategic Plan Alignment

The 2023 Internal Audit work plan supports the Strategic Plan – Working Together for our Future pillar. Through projects identified, Internal Audit will utilize a systematic and disciplined approach to evaluate and improve the effectiveness and efficiency of the City's governance, risk management and internal controls.

Financial Implications

Implementation of audit recommendations could have financial implications, leading to a more effective governance, risk management and internal control environment.

Report

The work plan was developed using a risk based methodology approach and complies with the City of Guelph's internal audit charter mandate as well as supports the City's Strategic Plan.

The 2023 work plan (Attachment 1) sets out the priorities of the Internal Audit department, are reflective of the City of Guelph's objectives, and the Strategic Plan priorities; integrated and coordinated with the risk assessment performed by Internal Audit. The specific scope of each project will be determined during the project's planning phase.

Summarized below are several factors considered in developing the work plan:

- Internal Audit risk assessment results;
- Last time an area/process was audited;
- Results of previous audits;
- Consideration requests from management and members of Council;
- Strength of internal control environment; and
- Emerging trends.

The annual work plan may be adjusted throughout the year as other issues or concerns are identified.

The work plan (Attachment 1) is based on the availability of two full time auditors for the full year. The Plan will need to be adjusted if adequate resources are not available throughout the year.

The proposed 2024 and 2025 work plan (Attachment 2) has been updated based on the same factors described above in developing the current year work plan.

Internal audit activities will be conducted in compliance with the International Standards for the Professional Practice of Internal Auditing.

2022 Activity Summary:

The 2022 work plan was based on two full time auditors however, resources of two full time staff were not available for half of the year which resulted in two projects remaining and in progress at year end. The playground inspection and parks maintenance audit was substantially completed as of December 2022 with an information report expected to be issued in March. In addition, development work on an Enterprise Risk Management (ERM) framework was paused due to the resource challenge. This work will continue throughout 2023. As a result, eight projects were completed in 2022 while two projects were in progress as of December 2022. All audit recommendations made in the audit reports have been accepted by management. In addition to the projects identified on the 2022 work plan, three consulting projects were completed during the year.

As part of Internal Audit's goal of continuous improvement, Internal Audit utilizes a client survey at the end of each completed audit project to receive feedback. The feedback received is used to identify opportunities to enhance the internal audit process. In 2022, three surveys were issued. Client satisfaction rate, based on the feedback, was 95 per cent versus a target of 85 per cent.

Financial Implications

Implementation of audit recommendations could have financial implications, leading to a more effective governance, risk management and internal control environment.

Consultations

The Executive Team has been consulted and supports the proposed work plan.
