

Hello

Re development of land at 300 Water Street Guelph.

I would like to support the suggestion that the area under the Hydro wires, behind this property, be paved over in a similar fashion to provide parking as happened at the

Masjid - Muslim Society of Guelph at 286 Water Street.

The paving costs should be paid by the developer and included in the cost of the homes being built at 300 Water Street.

On street parking in the area is already at its maximum level and the addition of 7 new homes with vehicles will make this a very difficult area to navigate.

There is a large amount of traffic that comes and goes in the area at all times and especially on Friday afternoons or whenever there is an event at the

Masjid - Muslim Society.

Please consider the neighbourhood traffic patterns and also the neighbours and visitors who already have trouble parking in the area since the parking spaces on Water Street are overloaded.

The new development needs to provide on site parking for vehicles associated with 300 Water Street and not rely on street parking being available.

Thank you.

Lynn Roodbol
