

Good Morning, City Clerk

This message is to strongly communicate my perspective against on-line and remote voting as it is described.

As a resident of Guelph who pays attention to events in Guelph and does vote, my primary reasons include opportunity for less than honest tactics and use of these options.

I recall the May 2011 robocall federal election scandal, the centre of which was in Guelph. Years later although only Michael Sona was implicated, the judge in closing summary indicated the scope was beyond more than one young campaign volunteer. That was 2011 - in 2024 much more including AI is accessible for potential to interfere with voting.

Without question all eligible voters should have opportunity to vote however several more secure options continue to be available.

Respectfully,  
Elizabeth Fontaine
