

Hello

I moved into this beautiful city 5 Years ago as an immigrant and all I see is potential that is greatly contended by the undeniable global economic strains we are all faced with as humans.

The truth about this is the fact that Arts is that healthy distraction and comfort people need to keep their heads and minds for preservation and that leadership mantle falls on the city to shoulder.

A lot of people may not really fully appreciate the power of arts and culture to the well being of the people and the untapped tourism potentials. As an immigrant that has lived in a country that has weathered economic pressures, I fully appreciate the connection and significance of this, hence my support to preserve the Drill Hall and use as a "Community share space"

The benefits are far more reaching!

Thank you for your consideration.
