

I want to register my opposition for affordable housing to be built in the above park.

I live in the area, and Echo Drive is a dead-end street at the park. It muffles the noise from Edinburgh Road because of the distance and the trees.

The park is used by many for all sorts of reasons, including playing baseball there is a diamond at the park. It is a green space and is valuable it helps mental, physical and environmental health. There is no medicine that can compete with the many benefits of having a local park you can walk to and relax.

My next question is this, the park used to be a quarry - so the machines went under the water line wouldn't that make the water contaminated? Then they put a landfill in that area once again is that another risk for health: to think about building on top of that no matter how long ago it happened.

We in the area enjoy the green space and that is important to all of us, so please do not take away this park.

Thank you  
Elizabeth Holohan
