

Hi there,

I am writing to bring awareness and my concerns involving the current state of downtown Guelph. With the current homeless and addict population on the streets of downtown it no longer feels safe. On multiple occasions I have witnessed open drug use, defecation and even public sexual acts by these individuals as well as being followed and yelled at.

Downtown Guelph used to feel safe to go for a walk and grab a beer or a coffee. We didn't have to worry about needles on the ground, propane in tents and whether or not the man laying face down on the sidewalk is alive or not

I'm hoping the city has a plan in place to address these issues as it is getting out of hand and we are losing our downtown atmosphere and community
