

I would like to point out that our company employs roughly 15 residents of Guelph and we proudly have an office downtown where we transact business at local banks, business and restaurants.

Quite simply if there is a continued proliferation of encampments in the downtown area we will not continue to do business in the downtown of Guelph.

It is certainly imperative the city do everything within its power to offer accommodations to the homeless of our community, but allowing public encampments downtown is not acceptable and it will drive away business, including ours.
