

Hi,

I am writing as I have concerns about this plan.

I ask that you please evaluate all feedback you receive and ensure that the Heritage Conservation Plan protections are commensurate to the Heritage Value to our community. My life has been touched on a personal level by the recent destruction of land around my home. Sadly land that is not used for the growth and expansion of humanity is deemed underutilized. I understand the majority seem to feel the expansion of the human population is far more important than trying to support the local wildlife and preserve natural areas, but not everyone shares this view. I am one of them and do not support what I see as the mindless growth of humanity. I understand the majority seem to feel the expansion of the human population is far more important than trying to support the local wildlife and preserve natural areas, but not everyone shares this view. I am one of them and do not support what I see as the mindless growth of humanity.

As someone that strongly supports the Urban Park Guelph I suggest creating a Natural Urban park on this site, a designated wildlife area that could support birds, flora and fauna that would provide an educational area for citizens as well as a space of true beauty.

Most sincerely,
Chris Mitchell

I would strongly suggest creating a park and small designated wildlife area that could support birds, flora and fauna, this would provide an educational area for people as well as a space of true beauty. I ask that you please consider this alternative approach, as to the benefit of all.

Thanks for your time and consideration on this extremely important matter.
I appreciate that you will be noting on the public record and sharing my concerns.
