

Re: Application for variance at 79 Northumberland St

We are Mike and Kate Lockwood, the owners of 83 Northumberland St. Our home is a Confederation cottage immediately to the west of the subject property. The applicants are seeking approval to install eavestroughing along the wall of the existing building, which will overhang our driveway. We have no objection to this variance as it will prevent ice, snow and rainwater from coming off the roof onto our vehicles.

As well we have been assured that the style, character and scale of development as a whole, will be in keeping with the historical nature of the neighbourhood, especially as it sits between two historic stone cottages./

We are unable to attend the meeting, so would kindly request that we be notified of the decision regarding these variances.

With Regards

Kate and Mike Lockwood
