

To my councilor

I think these cameras should not be sourced from or run by American companies. I would prefer we do not have them at all but if Guelph is going to have speed cameras then they should be using a Canadian company. Lastly, maybe Guelph should be installing cameras where 100% of the revenue goes back to the city of Guelph, instead of Arizona, and that money used to offset the ridiculous tax hikes that keep getting imposed upon us for crappy service and over priced projects that the majority don't want.  
Thank you.
