

# Attachment-3 Heritage Friendly Insurance Brokers and Companies

## Insuring Your Heritage Home

Insurance for a designated heritage home is often as unique as the home itself. It is important to find a knowledgeable broker to help create a policy that works for you. Some other steps that can be taken include:

- Preparing a condition assessment of your property
- Ensuring wiring and plumbing has been upgraded
- Preparing a prospectus outlining the important attributes you aim to protect
- Contacting heritage planning staff with bylaw and attribute questions
- Sharing the designation bylaw with your potential insurer
- Contacting the Insurance Bureau of Canada if you require guidance and advice
