

Dear Mayor and Councillors

Regarding the GRCA Niska/Kortright lands on the agenda for Feb 10th meeting

I request that you use the powers you have to re-designate the entire GRCA parcel of land at this site as parkland for the City of Guelph.

The need for this is great since our parkland is insufficient for a population of over 200,000 people. Also the site is rich habitat for many species that are also needed for a future that will be less resilient because of declining birds, Lepidoptera and other species. Our human resilience in a climate stressed world is strengthened with habitat such as this.

Please re-designate the entire GRCA parcel as parkland.

Sincerely

Norah Chaloner
